## ACHIEVEMENTS

- **HackerRank**
  - 30 Days of Code Badge
  - 10 Days of JS Badge
  - Problem Solving Basic
  - Problem Solving Intermediate
- **The Sparks Foundation**
  - The Silver Hand

## REMOTE INTERNSHIPS

- **TwoWaits Technologies Pvt. Ltd**
  - Tathasthu DSA Scholor Intern
- **LetsGrow More**
  - Web Development Intern
- **The Sparks Foundation**
  - Web Development Intern
- **Oasis InfoByte**
  - Web Development Intern

## PROJECTS

### 1) QR Based Ticket Entry System                                        Feb 2022

This is our diploma final year project. In this project visitors simply have to register and verify their email, and phone, and after login, they can get an entry pass for Museum. Entry Pass is a QR code, that allows visitors to enter.
- https://github.com/SnehuD/Ticketless-Entry-System-for-Museum

### 2) Employee Management System                                          Oct 2021

Employee Management System using Django and Python. In this system, user can register, login, forgot password, display profile, update profile and delete profile.
- https://github.com/SnehuD/Resume-Builder

### 3) Email Sending System                                                Feb 2022

In This System User have to register on a portal and after registration user have to verify his email. After successful Login user will redirect to the dashboard and then he can display, update his profile, Send an Email to a Email By Emailer
- https://github.com/SnehuD/Email-Sending-System

### 4) Basic Banking Application                                           Oct 2021

This Project is to develop a Basic Banking System that stores the list of customers and allows us to transfer money among the available customers while maintaining a transaction record. I've used HTML, CSS, JavaScript and PHP in order to implement this project.
